WILLIAM HENRY RAWLE,	THE MAYOR OF THE CITY.

EXECUTIVE COMMITTEE.

PRESIDENT AND CHAIRMEN OF ALL STANDING COMMITTEES.

THE
NINETEENTH ANNUAL REPORT
OF THE
DIRECTORS OF CITY TRUSTS.

To the Legislature of the Commonwealth of Pennsylvania, the Councils of the City of Philadelphia and the Board of Appointment, composed of the Judges of the Courts of Common Pleas of the County of Philadelphia.

THE DIRECTORS OF CITY TRUSTS respectfully present their Nineteenth Annual Report, for the year ending December 31, 1888.

In April, William M. Smith, Esq., having been elected to succeed Mr. Charles Lawrence as President of Common Council, took his seat as a member of the Board.

In the same month Col. Alexander Biddle was reappointed a Director by the Courts of Common Pleas of the County of Philadelphia to fill the vacancy caused by the resignation of Dr. James Simpson.

Michael Clark, who had been employed for many years in the care of the timber lands of the Girard Estate, died on the tenth day of November, 1888. He had always performed his duties faithfully.

Our Solicitor has continued to press the suits of the Estate for French Spoliations upon the Court of Claims. He reports, however, that in addition to the natural difficulties surrounding a satisfactory establishment of claims of such antiquity, opposition has again appeared in Congress, which may postpone or entirely defeat these reasonable and just demands.

The re-organization of the bonded indebtedness of the Philadelphia and Reading Railroad, Philadelphia and Reading Coal and Iron, and the Schuylkill Navigation Companies, which by authority of the Courts we have accepted, has made a marked change in our list of Stocks and Loans. The details of this exchange of securities are given in the statement of the Superintendent of the Girard Estate, together with details of capital, income, investments and expenditures of the Estate. (*Appendix A.*)

GIRARD ESTATE WITHIN THE CITY.

Our income from Real Estate in the City, though fully equal to that of several years preceding the year 1887, falls considerably below the income of that year.

The deficiency is due to several causes. During a part of the year 1887, rents were received from stores on Market Street below Twelfth, and dwelling houses in Girard Street, the income of which was lost to us during 1888, while the new buildings were being erected on their sites. The removal of the Stock Exchange from our building in the rear of the Girard Bank to its new quarters in the Drexel Building, has naturally had a depressing effect upon all property on Third Street near Chestnut, where the Girard Estate owns a considerable number of houses. The rentals on Water Street and Delaware Avenue, in the neighborhood of Market Street, have also declined. These last reductions being caused by the shiftings of trade centres, may not be so serious as at first they might seem; other trades, usually, after a more or less brief lapse of time, coming in to take the place of those removed.

We have every reason, however, to anticipate a considerable increase of rents during the coming year.

The six stores at Twelfth and Market Streets, a description of which was given in our report of one year ago, are now nearly completed. Two of them have been rented, that at the corner of Twelfth Street, Nos. 1140-42, to Messrs. N. Snellenburg & Co.; that adjoining it on the east, Nos. 1136-38, to Messrs. John T. Bailey & Co., and negotiations are in progress for Nos. 1120-22.

We anticipate no trouble in renting advantageously the remaining stores.

The store No. 27 South Eleventh Street has been improved and leased to the Spellier Electric Time Company, at an increased rental.

Messrs. Hood, Bonbright & Co., tenants of the store Nos. 1100-14 Market Street, having sold out their business to a firm composed of John Wanamaker, Thomas B. Wanamaker and Robert C. Ogden, who are to continue to use the name of Hood, Bonbright & Co.; permission of the Court has been obtained to make the exchange of tenants.

IMPROVEMENT OF THE EASTERN FRONT OF THE CITY.

The proper administration of the bequest of \$500,000 for the Improvement of the Eastern Front of the City has, of late years, been a very difficult task.

Mr. Girard directed that the income of this fund should be applied exclusively to the following purposes:

To lay out, regulate, curb, light and pave, etc., what is now Delaware Avenue, between Vine and South Streets.

To pull down and remove wooden buildings from the old City.

To regulate, widen, pave and curb Water Street, and to distribute Schuylkill water therein.

To further improve the Eastern Front of the City.

Under these provisions, we have, during the past year, removed eight wooden buildings, at a total cost of \$575.00, and have expended

\$7989.44 in electric lighting, \$3215.00 in cleaning streets and alleys, and \$2514.07 in repairing street pavings, crossings, inlets, drain pipes, etc.

The cartway paving of Delaware Avenue is in a bad condition, and would be put into thorough order at once, were it not for the fact that by several Ordinances of Councils, authority was granted to lay railroad tracks upon said Avenue, under conditions which require the Company laying such tracks, to forever keep in good order and repair a large portion of the highway upon which the tracks were laid. Hence we do not feel at liberty to make any expenditure upon repairs which a responsible corporation has agreed to make, without any expense either to the Estate or to the City as a municipality.

GIRARD ESTATE WITHOUT THE CITY.

Our income from rents and royalties of collieries, rent of real estate, sale of surface rights and of timber, in Schuylkill and Columbia Counties, amounting to \$502,275.29 was greater than it has been in any year except 1883, when it amounted to \$514,180.74. Had the strike which commenced in September 1887, not continued for nearly two months of 1888, the income from the coal region would have been the largest we have ever received.

Unless the production is checked by some unforeseen circumstance, the shipments of coal from the Girard Estate will, in 1889, exceed one million and a half (1,500,000) tons.

The heavy taxes imposed upon our property in Schuylkill and Columbia Counties, have long been a subject of contest between our officials and the local authorities in these counties. In 1870 and 1872 the road supervisors of Conyngham township, under the form of law, contracted large debts in the construction of unnecessary roads, in order to pay which, an annual tax of about 46 mills on the dollar has since been levied; while the levy and collection of the poor tax has been open to still graver objection. For this year, a large reduction was secured, but as for the poor tax almost the

only hope of relief lies in the repeal of the legislation establishing a poor district in this township and its consolidation with the poor district of Columbia County.

In accordance with the plans decided on several years ago, we continue to erect inexpensive farm buildings on our unimproved lands in the Catawissa Valley, and to lease the same. During this year, a farm cottage, barn and outbuildings, all well supplied with water, have been erected on the Joseph Evans tract. The farm comprises one hundred and eight acres, thirty-nine of which are cleared, and have been under cultivation. A photo-collotype of this farm house is shown as a frontispiece to this report.

Prior to this year, nearly seven thousand trees had been planted on our lands in the coal region.

During 1888, the ground forming the water-shed of Lost Creek, east of the reservoirs of the Girard Water Company, has been further cleared of brush, the best of the young oak, pine and chestnut sprouts which have sprung up spontaneously being selected for cultivation, and the fencing has been extended. Ten thousand European larch trees were set out in April and May along the northern bank of the No. 3 reservoir and along the stream east of the reservoirs, and twenty thousand more young trees and seedlings of the same variety will be set out next Spring.

A statement in detail of the transactions of the Estate in the coal region is annexed. (*Appendix B.*)

In September, the annual inspection of the mines and other property of the Estate, was made by members of the Board, accompanied by some of the Judges of the Courts of Philadelphia and Schuylkill Counties, and also by several Justices of the Supreme Court of Pennsylvania who had never before joined us.

GIRARD WATER COMPANY.

The Reports of the General Manager and of the Secretary of the Water Company are annexed. (*Appendix B.*)

GIRARD COLLEGE.

The condition of the College continues satisfactory. As a rule, the boys have been well-behaved and orderly, and have made fair progress in their different schools.

The number of pupils in the College on the first of January, 1888, was.....	1,375
Admitted during the year.....	135 1,510
Indentures Cancelled.....	117
Indentured.....	6
Discharged at eighteen years of age.....	2
Died.....	8
Expelled.....	9 142
Present number.....	1,368

The total number of admissions to the College since the opening in 1848 to January 1st, 1889 is.....4,021

The number of boys still on our roll waiting for admission is two hundred and sixty; of these two hundred and forty-eight are from Philadelphia and other parts of Pennsylvania, and twelve are from other states or countries, viz: five from New Jersey, four from New York, one from California, one from Delaware and one from Wales. It is evident, therefore, that applicants continue to present themselves more rapidly than they can be admitted. This state of things has continued with scarcely an intermission from the foundation of the College. The noble charities which have been just instituted by the Misses Drexel and by Mr. Isaiah V. Williamson will, it is hoped, afford ample room for the admission of those for whom we can find no place.

There has been of late much criticism of old systems of education. While rules and definitions are important, it is of much more

importance to the student to have a clear comprehension of the subject of his studies. In this connection, the President of the College has impressed upon the teachers the importance of frequent discussions with the scholar of the subject matter of the lesson, requiring him to express the ideas he has received in his own language, thus testing his actual progress.

In the Department of Natural Philosophy, a new chemical laboratory has been furnished, which facilitates a more extended course of instruction in this important study.

Great attention is paid to drawing. Free hand and mechanical drawing are taught to all who are old enough to profit by it.

During the year one hundred and sixty additional boys were admitted to the School of Mechanical Instruction. This has been accomplished by extending the course to pupils in the second grade of the third school, who have been found old and strong enough to derive benefit from such instruction. There are now upwards of four hundred and fifty boys in this department.

No more striking illustration of the change in the apprentice system can well be afforded than is shown by a comparison between the number of boys bound out this year and in 1870, when our first report was made. Of the one hundred and twenty-one boys who left the College in 1888, desiring occupations, we were able to obtain indentures for but six, while one hundred and fifteen found ready employment. In the year 1870, out of seventy boys who left the College, fifty-three were indentured. Fortunately, however, the training now given in the use of tools, in free hand, mechanical and geometrical drawing, in short-hand and type-writing, and in telegraphy, enables us to find places for them with comparative ease. This is best shown by the fact that while formerly at least ten per cent. of the pupils were unable to obtain positions before reaching the age of eighteen, last year there were none, and this year but two, on an average less than one per cent. who remained in the College until compelled to leave on age.

Mr. Girard, in naming the occupations in life preferred by him

for the pupils, first mentions agriculture. While we often obtain places for boys with farmers, the Board has never seen an opening for special instruction in this art. A scheme to accomplish this, to some extent, in connection with the cultivation of our Catawissa lands has been suggested, and is now in the hands of a committee for consideration.

The Supreme Court decided, in 1868, that the income of the Residuary Estate should be used, exclusively, for the maintenance and education of orphans in the College, and for providing increased accommodation until the whole of the College ground is fully occupied for this purpose. In accordance with these views, plans for building an additional school-house to accommodate about 200 boys have been prepared and adopted, and arrangements made to complete the same early in the year 1890. The building will be erected south of the Chapel, it will be three stories in height, and be built as two wings, connected by a corridor with anterooms, and heated by steam from the general heating plant in the College, with a special provision for the distinct ventilation of each department.

Miss Florentine A. Merino, in consequence of failing health, resigned the situation of Instructress in Spanish, which she had held for many years to the entire satisfaction of the Board. Her place has been supplied by the election of Prof. Gerardo Acha.

During the year, Miss Mary B. Bentley, a teacher of the Second School, and Misses Marion W. Long, Isabella M. Wilbur, and Anna C. Lewars, teachers of the First School, resigned. Their places have been supplied by Misses Emily V. Pfaff, Margaret McCoy, Annie D. Swift, and Mary V. Fox.

The health of the boys has been remarkably good when the delicate constitutions which so many of them have necessarily inherited is considered. To strengthen and improve them physically, constant drills of the battalion of College cadets are continued for the larger boys, while Prof. Lewis, an experienced teacher of gymnastics, gives regular instruction to the younger pupils.

The Chapel services, on Sunday, conducted by laymen specially selected and invited by the President of the College, continue to interest and impress the boys. On these occasions, all teaching is avoided that would be at variance with the will of the Founder.

During this year, diplomas have been given to graduates for the first time, and premiums were given as usual to boys who had distinguished themselves during the year.

On the anniversary of Mr. Girard's birth, an interesting address was delivered by Ex-Governor Hoyt. to the pupils, alumni, and assembled guests. A list of the officers of the College, and of distinguished scholars, with much other information in relation to the institution, will be found in *Appendix C*.

MINOR TRUSTS.

There are now thirty-four of these trusts. The income of twenty-five is distributed by us, of nine by the Department of Charities and Correction. A list of these and of the amounts invested for each, will be found in *Appendix D*.

A few years ago, Wills Hospital was in a deplorable condition; the old buildings, though out of repair and almost dilapidated, were crowded to overflow with poor men, women and children, many of them blind, and others suffering from acute diseases of the eye, which require constant attention. The small income of the charity, about \$14,000 per annum, was scarcely enough to supply the needs of the inmates. About three years ago, we found it necessary to appeal to the Board of Public Charities, some members of which having made a critical examination of the merits and needs of the Hospital, strongly recommended to the Legislature an appropriation for its relief. With this the old building has been repaired, and new wards built, which were absolutely required to meet the increasing demand for house room. Up to this time, we have been over-crowded with about sixty patients. We have now accommodations for one hundred, and this number would soon occupy our rooms were the funds commensurate with the demands upon us.

Even the number of inmates we now have, could not be supported were it not that we receive donations from time to time from charitable individuals.

While the Hospital is now capable of affording increased and more comfortable accommodation for a large number of inmates, much still remains to be done to place it on a footing to afford adequate relief to all who apply. An examination of the Surgeon's report (*Appendix D*) will show how many things are still needed by the eminent oculists who give their gratuitous services to these afflicted poor, reaching the large number of nine thousand four hundred and nineteen during the year 1888, far the greater number of whom are our own fellow-citizens. And of the five hundred and forty-two who have been lodged and fed, two hundred and fifty-two were residents of Philadelphia, two hundred were from other parts of the State, while only ninety were from other States and countries.

The following donations have been received during the year 1888, for this charity:

State appropriation (balance).....	\$7,500 00
Legacy of Joseph E. Temple.....	10,000 00
Legacy of Hannah C. Flickwir, on acc't.	2,500 00
Legacy of Harriet Erwin.....	1,000 00
Gift of a friend, C. B. M.,.....	500 00
H. K. Mulford & Co., (bill of drugs gratuitously supplied).....	53 08
	<hr/> \$21,553 08

Of these amounts, that received from the State has been used in the improvements to the East Out Ward; of the residue, about \$11,000 has been invested to this time.

The bequest of Miss Mary Shields continues to "relieve and make more comfortable the sick and insane poor in the Almshouse." Additional rolling chairs and bedsteads, magazines and illustrated papers for the sick rooms, cheap luxuries for the table on Thanks-

giving, Christmas days and on special occasions, and checkers, backgammon, and other games for the sitting-rooms, have been provided, and patterns for fancy embroidery have been furnished for the females, which, under the direction of the nurses, have afforded useful employment to these afflicted people. In future, as the income permits, and as soon as essential comforts are secured to the sick and insane poor in the Almshouse, we hope with the concurrence of the Bureau of Charities, to establish workshops, where all who are not violently insane may find occupation.

Since January, 1888, two new legacies have been received for other trusts—one, from the estate of Obadiah Wheelock, of two hundred dollars, the income of which is to be awarded, either in coin or United States currency, to a meritorious scholar of the Girls' Normal School of Philadelphia. This sum, less collateral inheritance tax, has been received and invested. The other new trust is created under the will of Henry Seybert, which, by its seventh section, provides:

"I give and bequeath to the City of Philadelphia the sum of ten thousand dollars, to be paid at the time, and in the manner herein-after directed, to be held by the city as a permanent and separate fund, to be called the 'Seybert Fund,' in trust, to invest, and keep the same invested, in legal securities, and to use and appropriate the income thereof for the distribution of fuel and bread amongst the deserving poor during the winter season."

This legacy has been invested in a well-secured mortgage.

Medals have been awarded, under the Scott Legacy for "ingenious men and women who make useful inventions," to:—

C. John Hexamer—System and Apparatus for Preventing and Extinguishing Explosive Fires in Grinding Mills.

Alex. E. Outerbridge, Jr.—Method of Carbonizing Fabrics and Obtaining Castings of the Same in Metal.

Isaiah Smith Hyatt—The Hyatt Pure Water System.

Elihu Thompson—Process of Electric Welding.

David Gestetner and Augustus D. Klaber—Cyclostyle.

John Gates—Steam Engine Cylinder Lubricator.

W. N. Woodruff—System of Keying for Machinery.

George W. Zeigler—Improvements in Trestles and Scaffolding.

Under the provisions of the trust founded in the name of Hannah M. Dodd, medals have been awarded to Miss Anna J. Hume and Miss Amy E. Strain, distinguished pupils of the Girls' Normal School.

During the winter of 1887-8, in accordance with the terms of the wills creating the various Fuel Funds, coal has been distributed as follows :

	Orders	Tons
Thomas D. Grover Fuel Fund.....	777	777
Elias Boudinot " "	360	360
Spring Garden " "	66	33
Paul Beck " "	204	102
City " "	158	79
F. Augustus Sheaff " "	22	11
Jacob J. Snyder " "	220	110
Mary Shields " "	118	59
Total,.....	1,925	1,531

The Board has pleasure in acknowledging the efficient services rendered by those in its employ.

By order of the Board,

W. HEYWARD DRAYTON,

President.

DECEMBER 31, 1888.

APPENDIX B.

REPORT OF ENGINEER

OF GIRARD ESTATE

IN SCHUYLKILL AND COLUMBIA COUNTIES.

APPENDIX B.

Messrs. LOUIS WAGNER, JAMES CAMPBELL, WILLIAM B. MANN, ALEXANDER BIDDLE, WILLIAM HENRY RAWLE, JOHN H. MICHENER, WILLIAM M. SMITH, *Committee on Girard Estate without the City of Philadelphia.*

GENTLEMEN:—

THE coal production of the Girard Estate in Schuylkill and Columbia Counties, for the year 1888, is one million two hundred and forty-seven thousand four hundred and fifty-three tons and fourteen hundred weight (1,247,453 $\frac{1}{2}$), which is larger by one hundred and ninety-two thousand five hundred and seventy-one tons and fifteen hundred weight than that of 1887. This increase was made mostly by Packer No. 2, Packer No. 3, and Packer No. 5, collieries, in which all work was suspended during three and a half months at the close of 1887. The collieries which have made a diminished shipment are William Penn, Kehley's Run, and Hammond, which continued at work during the labor strike of 1887 but were compelled by the extension of the strike to suspend operations for a time in January and February of this year. This great strike, which was inaugurated on the 12th of September, 1887, and which was still on against the Lehigh Region at the beginning of this year, was extended to cover the whole of the Schuylkill Region shortly after the opening of the year by the refusal of its operators to continue the increased wages demanded and conceded in September. Other concessions which had been made to the demands of the leaders of the labor organizations by the Philadelphia and Reading Railroad Company were also withdrawn at the beginning of the year and in consequence thereof the strike was further extended to

the hands employed on the freight trains of the railroad company. The production and transportation of coal were thus entirely suspended in all the Anthracite region excepting in the Wyoming Valley, where no demand had been made for increased wages. Everywhere coal was advanced to an unusual price, and in the mining region there was extreme restlessness, more or less violence and lawlessness, and some suffering. Many of the miners who had consented reluctantly to join in the strike were desirous of resuming work and insisted upon a settlement of the question at issue in one way or another. Finally, on the 17th of February the strike was declared off by the leaders, and directly thereafter the whole region resumed work at the rate of wages paid in September before the inauguration of the strike. Coal mining has since been uninterrupted and the production has been large. The total shipment to market of anthracite coal from the State of Pennsylvania for the year 1888 is thirty-eight million one hundred and forty-five thousand seven hundred and eighteen tons and four hundred weight ($38,145,718\frac{4}{10}$), exceeding that of 1887 by three million five hundred and four thousand seven hundred tons and nine hundred weight ($3,504,700\frac{9}{10}$). For the year 1889 it is not unreasonable to anticipate an addition of three million tons to the shipment of this year, making that of 1889, over forty-one million tons. This will make the rate of growth for the five years from 1885 to 1889 twenty-four and three-tenths per cent. upon that of the five years from 1880 to 1884, while the production of 1880 to 1884 actually increased forty-one and seven-tenths per cent. upon the production of the five years immediately preceding.

To meet the demand for next year the collieries on the Girard Estate are in better condition than they were a year ago. At the close of last year only four collieries were at work, and eight were idle. Of the latter, three were idle by reason of the strike and five because they had fallen into an unprofitable condition through lack of forethought to maintain a full production, or were allowed to stand idle for other cause. Four of these five have

been put in condition during the year and are ready now to take their places among the large producers. So that, of the twelve collieries on the estate, eleven are now in good working condition. Unless the production is checked by some unforeseen circumstance, the shipments of coal from the Girard Estate will exceed a million and a half tons in 1889.

The usual tables of annual coal production and revenue, with a detailed statement, of the condition of each colliery, of returns from lot leases, of farm improvements made, of farms leased, of timber sold, of forest tree cultivation, of county and township tax affairs, the opening and repair of roads, all of which have been submitted to you from time to time in special reports and passed upon by you, are given in the following pages.

MINING OPERATIONS.

LEASE NO. 1.—HAMMOND COLLIERY.—*Philadelphia and Reading Coal and Iron Company, Lessee.*—The months of January and February, which covered the period of the extension of the strike over the whole of the Girard Estate, were occupied at this colliery by repairs to its breaker and slope landing. The breaker front, bins and chutes were rebuilt, raised and set back from the track to make room for the use of the large gondola cars; screens, troughs, scrapers, and elevating buckets were added; the cleaning platform was enlarged, and the slope was furnished with new sheaves and ropes with additional length for its extension another lift. Mining operations for the year have been confined to the extension of one unfinished gangway in the Holmes bed four hundred yards to its lease limit, the mining of the coal from this territory and from old workings on the slope level in the Holmes and Buck Mountain beds and from the old Conner colliery drifts above water level in the Buck Mountain seam. The extension of the slope in the Mammoth bed was commenced in September. It is now down ninety yards. As soon as the slope is finished gangways will be opened in the Mammoth bed and tunnels driven to the Buck Mountain, the top split of the Mammoth, the Holmes and Primrose beds.

The old workings will maintain the present production until these improvements are completed, when a largely increased yield may be counted upon.

LEASE NO. 2.—GIRARD COLLIERY.—*Philadelphia and Reading Coal and Iron Company, Lessee.*—This colliery, which has been idle for two years and seven months, resumed work on December 6th, 1888. The improvements, which are now completed and which restore it to active life, were commenced in May, 1886.

They have been quite extensive, consisting of the sinking of two slopes (together seven hundred and twenty-nine feet), the driving of five tunnels, the opening of eight hundred yards of new gangway for sumps, turnouts and slope approaches, the opening of air-ways and erection of fans, the building and setting of eight new pumps with steam and double column pipes from the bottom of the slopes to the water level and eight additional boilers, and lastly, the rebuilding of the breaker.

In May of this year the machinery was taken out of the breaker and all of the old structure, excepting the gunboat tower, dump chute and jig-house, was torn down. The new breaker is now finished, completely equipped and running satisfactorily.

LEASE NO. 3.—NORTH ASHLAND COLLIERY.—*Philadelphia and Reading Coal and Iron Company, Lessee.*—Notwithstanding the loss of the first two months of the year, the shipment of this colliery is the largest it has ever made. Its gangways in the Buck Mountain bed have been pushed with vigor and breasts opened from them, while the old workings in the Mammoth bed have continued to yield a large product. In the driving of the west gangway in the Buck Mountain seam two faults were encountered in April and in September, which continued for one hundred and five yards and eighty-one yards respectively, and required five months to drive through. The extension of the main and counter-gangways into the Buck Mountain coal lying along the southern line upon the western end of the lease afforded the lessee an opportunity to mine out through these a body of coal beyond the line lying upon his own estate. A small payment is made on this coal for its right of way through the Girard Estate, and for the deposit of its refuse on the estate. The quantity of gangway driven has been fifteen hundred and seventy-two yards, all in the Buck Mountain bed. The stripping of the earth and rock from the Mammoth bed, where it lies near the surface over a small territory near the western end of the lease is under contemplation by the lessee. The production of

the next year from this lease should at least equal that of the year now closing.

LEASE NO. 4.—PACKER NO. 2 AND PACKER NO. 4 COLLIERIES. *Lehigh Valley Coal Company, Lessee.*—On April 2d, 1888, PACKER Number 2 COLLIERY resumed work after standing idle for two years and eight months. Some time was required to put its airways, gangways and plant in condition for active work, but, commencing with a shipment of forty-two hundred and fifty-two tons in April, it increased its production, until its shipment reached ten thousand tons in November. Its mining operations were carried on upon the second, third and fourth levels, and in the Mammoth, Mammoth Top Split and Holmes beds. Five hundred yards of new gangway have been opened in the Holmes bed and fifty yards in the top split of the Mammoth. A production of one hundred and forty thousand tons may be made next year.

PACKER NO. 4 COLLIERY suffered most severely by the great labor strike of the last and preceding year, not only being compelled to lie idle from the inception to the collapse of the strike, but being visited in the midst of it by an underground fire, which was prevented from destroying the whole plant only by the most judicious and prompt exertions of the lessee. The fire was extinguished on the last day of the year 1887. Though embarrassed by the refusal of former employes to work while the strike was still on and the difficulty of obtaining competent workmen the work of repairing the damage done by the fire was pushed forward immediately.

The slope was reopened and retimbered, the pumps on the first and third levels damaged by the fire were put in repair, the pump-house on the third level was rebuilt and surrounded with a wall and arched roof of stone laid in cement, the pump-way from it was supported and protected at the bottom by a stone arch, the column pipes destroyed were renewed, a shaft was sunk seventy-four feet

deep from the surface to the pump-house of the first level, a new fan and fan house were built and the trestling connecting the slope and the breaker which had been destroyed by the fire was renewed. On the 12th day of March, 1888, the colliery resumed its shipments, and has continued in active operation ever since. Its operations have been in the Holmes, Four Feet, Mammoth and Buck Mountain seams on the second, third, fourth and fifth levels. Fourteen hundred and fifty yards of gangway have been driven, most of which has been in the Buck Mountain bed. The timbering of the underground slope in this seam, from the third to the fifth level, was completed in August. The fifth level and fourth level gangways have been extended four hundred and three hundred yards respectively. The production from this lease is two hundred and sixteen thousand three hundred and forty-four tons and two hundred-weight, and for next year will be much larger.

LEASE NO. 5.—CONTINENTAL COLLIERY.—*Lehigh Valley Coal Company, Lessee.*—No coal has been mined under this lease since January, 1885. The slope to open the third lift of the Mammoth bed and the grade tunnel to cut the Primrose seam were driven in 1884. In the following year the apportionment of the production to the different regions admitted of the closing of certain collieries for the purpose of running others to better advantage. This colliery was shut down under that arrangement and has continued idle to the present time. It has belonging to it, yet unmined, a lift of coal in the Mammoth bed, the whole basin of the Primrose bed from the synclinal axis to the outcrop on either side and the Buck Mountain seam from the synclinal axis to the outcrop on the north side of the basin. In the latter seam the gangways stood in fault when the colliery was last worked. It seems not improbable that this is the same fault recently passed through by the West Buck Mountain gangway of North Ashland Colliery. The latter fault, if extended across the basin in a northeast direction parallel to the line of the known fault east of this, would lie about where this fault is found.

Some explorations have recently been made with the diamond drill to test the extent of the fault in this seam. Two holes were bored into the measures below the Mammoth bed, commencing on its bottom slate and extending a distance sufficient to cut the Buck Mountain seam. These holes were bored in the outcrop breaches above Mammoth breasts 41 and 62, eleven hundred and eighty feet apart. The cores taken out seemed to indicate a faulty condition of the seam at these points. A third hole is now being bored at a point thirteen hundred feet east of the first hole, in the breach above breast 85, which shows a more regular condition of the strata. It is probable that the mining of coal will be resumed at an early date.

LEASE NO. 6.—PACKER NO. 1 AND PACKER NO. 5 COLLIERIES.—*Lehigh Valley Coal Company, Lessee.*—The underground workings of the two collieries under this lease become each year more intimately connected. In their operation and management they are still kept separate.

PACKER NO. 1 COLLIERY has extended its gangways in the Mammoth Top Split and Buck Mountain seams five hundred yards. A tunnel from the Mammoth to the Holmes bed, commenced in September and now advanced forty-five yards, will connect the western workings with the shaft operations in this seam and afford an opportunity for a more direct opening to the surface and for more direct ventilation. On account of the difficulty of carrying steam so long a distance on the surface, and the danger and difficulty of maintaining the pump-ways by the side of the slope with the steam pipes in them, a vertical hole was bored from the surface to the pump house, six inches in diameter and three hundred and eight feet deep, in which the pipes were placed.

PACKER NO. 5 COLLIERY has extended east and west its Holmes, Mammoth, and Buck Mountain gangways, and has driven a

gangway in the Seven Feet seam, west of the tunnel, on a grade of thirty degrees, four hundred and fifty-six feet for use as a plane. With short tunnels south and north from the counter-gangway opened by this plane, all the Buck Mountain, Mammoth and Holmes coal between this and the No. 1 slope level may be brought to the surface without rehandling. The coal of all these seams thus far opened has proved of excellent quality. The Holmes bed has varied somewhat in thickness and in the proportion of refuse, and has not been opened to the same extent as the other two. The Mammoth workings, at a point six hundred yards west of the shaft, developed an anticlinal axis, which turned the gangway first south then east. The south side of the basin formed south of this anticlinal, having been first tested by a short inside slope, was reached by a tunnel twenty-two yards in length, and the gangway established again on the north dip.

The Buck Mountain workings have also just developed an anticlinal axis two hundred and seventeen yards east and a hundred and fifty yards south of this point, which has turned its gangway eastward.

A counter gangway in the Mammoth bed has been established above the main gangway on the west side which divides the long lift of coal between the shaft and No. 1 slope levels into two. It has been extended westward for three hundred yards and at its face now appears to be on the verge of an anticlinal axis, probably corresponding to that met by the west gangway in the Buck Mountain. This colliery and these particular underground workings were visited by you upon the occasion of your inspection of the estate in September of this year.

The tonnage from this lease for the ten months in which the colliers were at work more than doubled that of the preceding year. The next year also will show a large increase.

LEASE NO. 7.—WEST BEAR RIDGE COLLIERY.—*Philadelphia and Reading Coal and Iron Company, Lessee.*—This colliery which

had lain idle since December, 1884, resumed work on December 12th, 1888. The remodeling of the breaker for the preparation of the coal from this and East Bear Ridge Colliery, as it progressed, came to be the almost total renewal of the whole structure and equipment. The main body of the breaker was torn down and rebuilt, rolls and screens were taken out and replaced by newer and improved breaking and cleaning apparatus. The slope hoisting machinery was rebuilt and a plane added to hoist the breaker refuse to a better elevation. The colliery started work on September 1st, but after working twelve days was compelled to suspend again by the excessive rains. A new pump, of the Lessees' standard, was placed on the first level and a new column pipe run from it to the surface. Work was again resumed in October, and was continued without interruption to the end of the year. The coal mined is coming from the old workings of the Mammoth bed, on both sides of the basin, and from the extension of the east gangway on the south dip. The Buck Mountain gangways on the south dip will also be reopened and worked.

LEASE NO. 8.—EAST BEAR RIDGE COLLIERY.—*Philadelphia and Reading Coal and Iron Company, Lessee.*—For the purpose of connecting this colliery with the breaker of West Bear Ridge Colliery, a plane was built from the mouth of the old Girard Tunnel up the side of Bear Ridge and a surface railroad was laid to the West Breaker. Over this plane and road the coal mined at the East Colliery goes to be prepared for market along with the coal of the West Colliery. The coal mined is obtained from the old workings of the Mammoth Bed, from a new counter gangway driving in it, from the Buck Mountain bed cut by the extension of the water level tunnel, and from the stripping operations upon the outcrop of the Mammoth bed on the top of Bear Ridge.

LEASE NO. 9.—WILLIAM PENN COLLIERY.—*William Penn Coal Company, Lessee.*—The shipment of this colliery is two hundred and eighty thousand six hundred and seventy-five tons and four

hundredweight, making its product for the eight years, from 1881 to 1888, nearly two million tons, an annual average of a quarter of a million. Along with all others it was affected by the strike at the beginning of the year, but attempting to work, succeeded in shipping nine thousand tons in January and a larger quantity in February. The tunnel at the lowest practicable point above water level to cut the Buck Mountain bed was extended to that seam in June, making the whole distance from the Mammoth to the Buck Mountain four hundred and fifty-six feet. Subsequently the tunnel was extended one hundred and forty-five feet to the small seam lying under the Buck Mountain, which was found here to be four feet thick. The total length of gangway driven during the year was twenty-eight hundred yards, fifteen hundred yards of which were in the Mammoth bed and a thousand yards of which were above water level. Beside the coal from the ordinary mining operations underground, there is a large product now obtained from the stripping of the earth and rock from the outcrop of the Mammoth bed, which will add materially to the colliery's shipments for a number of years. A steam shovel just provided will facilitate the uncovering of the coal. The new shaft to open the deep coal at the western end of the lease is still in contemplation by the lessee.

LEASE No. 10.—KEHLEY'S RUN COLLIERY.—*Thomas Coal Company, Lessee.*—During the exciting times of the labor strike at the beginning of the year, the superintendent of this colliery made terms with his employees and resumed work, but the jealousy of the striking railroad hands against anything like an unwillingness to support them in their demands brought about an attempt to compel by violence the suspension of all mining work. On the fourth day of February, a mob made an attack with clubs and stones upon the men and boys employed at Kehley's Run Colliery as they were returning from work, beat them and probably would have killed some of them but for the timely arrival of a considerable body of special police. Beyond the wounding of one policemen by a

pistol shot from a rioter no serious casualties resulted from the collision. Nine days afterwards, on February 13th, the colliery resumed work again and continued at work, the strike ending by a circular from the labor leaders on February 17th. The mining of coal during the year has been in the Mammoth, Skidmore, Seven Feet, and Buck Mountain Seams, on the first level. Fourteen hundred yards of new gangway have been driven on this level. No coal has yet been mined in the lower level. The production for the year is one hundred and twenty thousand one hundred and thirty-six tons and nineteen hundredweight.

LEASE No. 11.—PACKER No. 3 COLLIERY.—*Lehigh Valley Coal Company, Lessee.*—The suspension of this colliery covered the whole period of the strike from September 12th, 1887, to February 23d, 1888, five months and eleven days, during which not only were all mining operations, for any purpose whatever, stopped but also all repairs and improvements looking to the production of coal in the future. The pumps were kept going for the drainage of the mine and for fuel to generate steam for the running of the pumps the refuse coal in the waste banks had to be resorted to. Upon the resumption of work, needed repairs were made, special precautions against underground fires, suggested by the experience of Packer No. 4, and other fires, were adopted and at the same time the production of coal was increased until in the month of August the shipments were twenty-one thousand tons. Five hundred yards of gangway were driven on the second level in the Seven Feet and Buck Mountain beds, and three hundred yards on the fourth level in the Seven Feet bed. A fault at the western face of the Buck Mountain workings on the second and fourth levels has hindered the advance of these gangways, but the explorations recently made seem to indicate the recovery of the coal in good condition. The workings in the Mammoth bed on the third, fourth, fifth and sixth levels continue to yield a large product. A plan is contemplated of opening the Holmes bed and Four Feet bed lying between the Holmes and

Mammoth, both of which have been proved by surface shafting. As a precaution against fire the wooden partitions generally used have been taken out of the headings on the west side of the deep slope all the way from the surface to the seventh level and walls of stone laid in cement substituted, and the pump room in the seventh level has been surrounded by a similar wall and covered by an arch of brick and cement. A vertical hole six inches in diameter and two hundred and seventy-five feet deep has been bored from the surface to the pump house on the second level in which pipes will be placed to carry steam to the pumps located there. The production for the year is the third largest on the Estate.

LEASE NO. 12.—SOUTH LAUREL RIDGE COLLIERY.—*Simmons H. Barrett, Lessee.*—No coal has been mined from this lease.

LEASE NO. 13.—KNICKERBOCKER COLLIERY.—*Philadelphia and Reading Coal and Iron Company, Lessee.*—Eighteen hundred and three tons and eight hundredweight of Buck Mountain coal have been mined from the territory covered by this lease.

LOT LEASES, FARM LEASES, AND SALES OF SAND AND STONE have yielded a revenue of forty-two hundred and ninety dollars and ninety cents (\$4290.90).

GIRARDVILLE TOWN LOTS have paid, in purchase money and interest, twelve hundred and fifty-two dollars and three cents (\$1252.03). No lots have been sold this year.

TIMBER cut and sold from the woodland of the estate returned twenty-two hundred and thirteen dollars and eighteen cents (\$2213.18).

FARM IMPROVEMENTS IN THE CATAWISSA VALLEY.—The improvements erected this year on the Joseph Evans tract were a

farm cottage, barn, and small outbuildings, all well supplied with water from the pipes laid to the small reservoir built in 1887. The land intended to be given to this lease along with these improvements is one hundred and eight acres, thirty-nine of which are cleared and have been under cultivation. The accompanying photocolotype, marked Farm No. 4, shows the farm-house built this year. These improvements were examined by you upon the occasion of your inspection of the estate in September.

A lease of the No. 4, farm will be made as soon as an acceptable tenant can be found. An orchard of one hundred and twenty choice apple, pear, cherry, plum, and peach trees, and a number of small fruit vines and bushes, was planted on the No. 3, farm of William N. Zeller, and a similar orchard on the No. 1, farm of Chances Clark.

It is proposed to place the improvements to be erected next year between the No. 1, farm of Chances Clark and the No. 4, farm just built upon. The public road at this point is badly located both for the farm improvements and for public travel. A new road is proposed, on a better grade, which will afford a desirable site for the farm improvement, lying well toward the sun and convenient for drainage and water.

FOREST TREE CULTURE.—The ground forming the watershed of Lost Creek, east of the reservoirs of the Girard Water Company, has been further cleared of brush, the best of the young oak, pine and chestnut sprouts which have sprung up spontaneously being selected for cultivation, and the fencing has been extended. Ten thousand European Larch trees were set out in April and May along the northern bank of the No. 3, reservoir and along the stream east of the reservoirs, and an order for twenty thousand more young trees and seedlings of the same variety was placed, which will be set out next spring.

TAXES.—At length, after almost a score of years, the taxes of Conyngnam township have been reduced to a rate but little above

the rates of other districts. The total taxes of this year are but thirty-six and nine-tenths mills, which is nine and three-fourths mills lower than of any year in the last fourteen. This relief has come for the most part in the special road tax, which has been as high as twenty mills and never lower than thirteen mills during this period, until this year when it was reduced to five and seven-tenths mills. After this year it will be altogether discontinued. The debt which required its imposition has been paid. This debt was contracted in the years 1870 to 1872 under form of law, to make roads which were not needed, but which were built for the purpose of furnishing occupation or a pretence of occupation, to the superabundant labor then in the mining region, during the frequent suspensions of mining resulting from excessive production. Orders drawn by the township supervisors upon the township treasurer and issued in payment of this work, were taken by merchants or bought up by speculators at large discount and judgment was obtained on them against the township. From 1874 to this date more than a hundred thousand dollars were collected and paid in settlement of these judgments and interest thereon. The poor and special poor taxes, the management of which has been, in their way, even more scandalous, have been reduced from fifteen to eleven mills. The only positive remedy for this mismanagement is a repeal of the special legislation establishing a poor district in this township, and consolidating this with the poor district of Columbia county. The large powers delegated to poor directors under our laws have been a source of corruption, even where the district embraces the whole county, but there is less likelihood of misbehavior and a greater probability of obtaining good men for the office where the district embraces the whole county, than where, as in this case, the district is away from the observation of the public press and criticism.

In Butler township also the tax rates are reduced by the final payment of the road debt which was created very much after the same fashion as that of Conyngham township. West Mahanoy

township rates have been increased, for the most part by the levy of increased rates of school tax for building purposes. Three-quarters of a mill were required also for a road tax for the purpose of making a new road and building a bridge across the Shenandoah Creek. In Butler, West Mahanoy, and Conyngham townships the roads have been made and kept in repair by the tax-payers without a regular road tax levy. In Girardville borough the money realized from the tax upon liquor licenses afforded an opportunity of reducing the borough tax. In Shenandoah, where the borough's share of the tax on liquor licenses was eight thousand seven hundred and twenty-five dollars, the taxes were continued at the same rate as in the preceding year. The rate of tax levied in each township and borough for every purpose during the year 1888, and the total of the taxes at the rates levied for the last three years are given in the following table:

Township or Borough.	Road or Borough.	Special Road.	School.	County.	Poor.	1888. Total Mills.	1888. Total Tax.	1887. Total Mills.	1887. Total Tax.	1886. Total Mills.	1886. Total Tax.

Michael Clark, who was appointed Wood Ranger of the Girard Estate upon the organization of the Board of Directors of City Trusts in 1870, and was employed for many years prior in the care of the timber lands of the Estate, died on the tenth day of November 1888. For some months prior to his decease he had been incapacitated from the active duties of his office but when in health had

been active, vigilant and conscientious in the performance of his duties.

I take pleasure in testifying to the faithful care of the business of the Estate by its officers under and associated with me in Schuylkill and Columbia counties.

Very respectfully yours,

HEBER S. THOMPSON,
Engineer Girard Estate.

POTTSVILLE, PA., *December 31, 1888.*

GIRARD WATER COMPANY.

Messrs. LOUIS WAGNER, *President*, and JAMES CAMPBELL, JOSEPH L. CAVEN, W. HEYWARD DRAYTON, WILLIAM B. MANN, *Directors of the Girard Water Company.*

GENTLEMEN:—

FOR the greater part of this year the reservoirs of the Company have been full to overflowing. The aggregate capacity of the two upper reservoirs is a hundred and twenty million gallons. The inflow of the stream kept them up to this quantity until the tenth day of July. On the twentieth day of August the reservoirs were drawn down two and a half and four feet, but still contained ninety million gallons. On this day a remarkably heavy rainfall occurred, five and sixty-five hundredths inches in twenty-four hours, exceeding in one day the rainfall of any one month in two years, excepting of August, 1887, and June, 1888. The reservoirs were immediately filled again, and have continued full to the close of the year. The total rainfall of the year is $62\frac{62}{100}$ inches, largely exceeding that of the preceding year.

The rainfall monthly was as follows:—

January	3.50 inches.
February.....	3.45 “
March.....	4.35 “
April.....	3.29 “
May.....	7.08 “
June.....	6.50 “
July.....	3.34 “
August.....	8.58 “
September.	8.18 “
October.....	4.83 “
November.....	4.90 “
December.....	4.62 “

Total..... 62.62 inches

Some changes were made in the location of pipe lines at Packer No. 5 and William Penn collieries, but no new lines of pipe have

been laid. The change of the line at William Penn Colliery was made necessary by the advance of the colliery's refuse banks over the old line. The pipe is now laid upon the new road over the Shenandoah Creek, both the road and the pipe being more advantageously placed, because crossing the valley upon a more direct line from one side to the other, and consequently less liable to be disturbed by the settling of the measures from mining operations under them. The perpendicular perforated pipe in the distributing reservoir, through which the whole supply flows to the mains, was taken out and a longer pipe laid nearly horizontally in its place. This reservoir was thoroughly cleaned, and pipes were laid in it for the discharge of the sand and mud which is washed down from the steep sides and descent of the ravine, through which the stream flows from the No. 2 reservoir. The work of removing the logs, stumps and roots from the creek channel above the reservoir was continued during the year, and the surface of the plateau forming the water-shed of the creek was cleared of brush and logs, preparatory to setting out upon it a second growth of forest timber. On this ground ten thousand young European Larch trees were planted by the Directors of City Trusts last spring and twenty thousand more have been ordered for setting out next spring.

The water supplied to consumers during the year was one hundred and two million two hundred and five thousand seven hundred and fifty-one gallons, as follows :—

William Penn Colliery.....	30,115,677	gallons.
Packer No. 5 Colliery.....	11,608,212	“
Hammond Colliery.....	9,944,660	“

Packer No 1 Colliery.....	5,377,222	“
Girardville Borough.....	15,616,146	“
Lehigh Valley Railroad Company....	1,704,020	“
Houses at Lost Creek.....	713,220	“
Total.....	102,205,751	gallons.

The largest monthly consumption (in October) was eleven million three hundred and fifty-two thousand and twenty-two (11,352,022) gallons.

The smallest monthly consumption (in May) was six million six hundred and forty thousand one hundred and forty-six (6,640,146) gallons.

We have never yet, since the building of the No. 3 reservoir, had a drought which put to any severe test the capacity of our works. There is therefore no reason yet apparent for the addition of the eight feet to the height of the embankment of that reservoir, for which provision was made in its construction.

The embankments, waste ways, gates and pipes of the reservoirs are in good condition. No work will be required during the next season upon them, and none upon the main pipe lines, excepting in incidental repairs.

Very respectfully yours,

HEBER S. THOMPSON,
General Manager.

POTTSVILLE, PA., *December* 31, 1888.

Wills Hospital and Minor Trusts.

WILLS HOSPITAL.

SURGEONS' REPORT FOR 1888.

The Surgeons of the Wills Eye Hospital herewith respectfully submit their Annual Report to the Honorable Board of City Trusts. The Hospital has been greatly improved during the past year by the erection of a well-ventilated and properly-appointed Ward for Women, thus permitting the abandonment of the insufficiently-ventilated apartments used for this purpose in the old building. There are now ample accommodations in roomy and well-ventilated wards for one hundred patients. The opening and equipping of a convenient drug store to enable the Resident Surgeon to put up the medicines used in the house, has worked well and saved money for the Hospital. What we still need most are laundry facilities for washing the patients' clothes; Hospital clothing for those who are without a change, and above all increased clinical accommodations. The rooms now used for the dispensary service are entirely inadequate to the demands made upon them by the greatly increased number of outdoor patients. These patients are uncomfortably crowded and the atmosphere is oppressive; noise and confusion are unavoidable, and the Surgeons are retarded in their work. New clinical rooms are therefore urgently needed, and we would respectfully suggest to the Board of Managers, that new rooms for these purposes can be

best obtained by building an extension of the Hospital, at the east and west ends, on the now unoccupied ground belonging to it. A new and properly-constructed laundry and drying room, and the erection of new elevators for distributing food are crying necessities of the Hospital. During the past year, 9,515 persons applied for treatment, the largest number yet recorded in any one year. Of the number admitted to the Hospital, nearly one-half came from beyond the limits of Philadelphia, and we would therefore once more urge the justice of the Hospital's claim for aid from the State at large.

ANNUAL REPORT OF RESIDENT PHYSICIAN FOR 1888.

Philadelphia, January 1, 1889.

Resident Physician's Report for the Year of 1888.

Number of patients in the House at last Report, January 1, 1888:—Males, 34; Females, 26; Total,	60
Number admitted during the year 1888:—Males, 367; Females, 175.....	“ 542
Number discharged during the year 1888:— Males, 359; Females, 181.....	“ 540
Of these were:	
Cured, 318; Improved, 210; Unimproved, 31;	
Died, 1.....	“ 540
Number of patients now in the Hospital—	
Males, 42; Females, 20.....	“ 62
Number of new patients applying at the Dispensary in 1888 (of whom 96 were able to pay)...	9,515
